

DOT announces steps to address Takata defects

May 19: Takata agrees to national recall of certain types of driver and passenger side air bag inflators. This expands the number of vehicles to be recalled to nearly 34 million. NHTSA will coordinate remedy program. [News release](#) | [Takata site on Recalls Spotlight](#)

CHAT HELP

**Search for recall by VIN**

Please Note: If you are checking to see if your vehicle is affected by the Takata air bag recalls, it generally takes anywhere from a few days to several weeks for automakers to gather individual VINs associated with a recall. It is important that you check back periodically as a recall on your vehicle may not show up immediately.
